OASIS INSULATION

why Oasis Spas are Different

Save money on your energy bill

THERMAL LOCK

Oasis Spas Thermal Lock R18 System

Insulation Solution	Skirt Thermal Lock	SPA Base Thermal Lock	In Spa Insulation	Features
RX Cabinet Insulation	Dual-aluminum soft wool(3mm) + one-layer PE wool(15mm)	One-layer dual-aluminum soft wool(3mm)	full soft foam insulation sprayed onto the inside of the spa not only holding pipework in place but giving high energy efficiency	Reliable thermal solution with basic insulation to lock the heat inside the spa within the cabinet.
HE / SWIM Overall Thermal lock	Dual-aluminum soft wool(3mm) + one-layer PE wool(15mm)	One-layer dual-aluminum soft wool(3mm)	full soft foam insulation sprayed onto the inside of the spa not only holding pipework in place but giving high energy efficiency	Reliable and most widely used thermal solution with extra insulation on the bottom, providing a higher efficiency heat lock function.

RELAX

with Oasis Quality

6 Layer Shell build up like no other

- 1 American made Aristech/Lucite acrylic surface
- 2 Hand painted pure vinyl ester resin for adhesion
- 3 Sprayed layer of vinyl ester resin/fibreglass composite.
- 4 Marine grade polyester resin/fibreglass composite for strength.
- 5 2nd layer of polyester resin/fibreglass composite.
- 6 High density closed cell (waterproof) foam insulation

8-10 mm 6-layer sheet structuring,
Upto 8 years warranty policy*.

Minimized possibility in disruption,
blistering, or separation.

Functional from -40 to 70 degrees.
